

WIRELINER LIFT FRAME

770-15,000 Hoist • 520-10,000 Hoist

Superior Performance Inc. introduces PowerWire, the newest tool in its Power Products line, designed for ultra deepwater work.

This patent-pending wireline lift frame is Lloyd's Register approved and has been dropped-objects tested and certified to ensure safety. The lift frame features attached safety pins and a basket that encases smaller parts and other moveable objects to prevent items falling to the rig floor from high above.

Interchangeable pivoting lift-sub

- Up to 15,000 pound hydraulic hoist
- Anti-2 block
 - Monitor and control panel
 - Dual brake system

- Up to 9-inch profile pin
- Safe pin carriage

- Rotating E-frame
- Up to 40,000-pound rating
 - Can install up to 2 E-frames

PowerWire is electric line and slick line compatible and offers greater control over speed than a coiled tubing lift frame via a compact control stand located on the rig floor.

This heavy-weight rig tool can be used in completions/recompletions, workovers and production jobs and for maintenance and servicing efforts.

PowerWire was designed to save time by shaving minutes and seconds throughout the lifting process. It is also easily transported, switching from lift mode to transport mode quickly.

PowerWire wireline lift frame offers the superior strength and quality you expect from a Superior Performance product.

BENEFITS

- Ready for ultra deepwater work
- Lloyd's Register approved
- Dropped-objects tested and certified
- Easily and quickly lifts 10,000 pounds or more
- Electric line and slick line compatible
- Easily transported
- Class 1 Division 1 and 2 compliant
